(54) MOUNT STRUCTURE FOR HEAT-SENSITIVE RECORDING INK RIBBON

(57)Abstract:

PROBLEM TO BE SOLVED: To prevent a heat-sensitive recording ink ribbon from being mounted wrong in an apparatus main body.

SOLUTION: First and second projecting parts 110a, 110b; 111a, 111b are formed with different angles at fit parts 67a, 67b; 70a, 70b of fitting members 69a, 69b; 72a, 72b fitted at end parts in an axial direction of a first and a second reels 65, 66 to which both end parts of a heat-sensitive recording ink ribbon 64 are wound, respectively. First and second recesses 112a, 112b; 113a, 113b are formed at positions of the end parts in the axial direction of the reels 65, 66 corresponding to the projecting parts. The fitting members 69a, 69b; 72a, 72b are hence prevented from being mounted wrong to the corresponding reels 65, 66. Moreover, a shaft 115a of the fitting member 72a is made to be different in outline from shafts 114a, 114b; 115b of the other fitting members 69a, 69b; 72a to indicate a mount direction of an apparatus main body.
